EXPERIENCE

SYNKT Games Miami, FL — *Software Engineer*

MARCH 2014 - NOVEMBER 2015

Was part of a small startup located in Wynwood developing an interactive, real-time hybrid mobile app called *letsRUMBL*, which is now available for iOS.

- Lead role in our Cordova/PhoneGap efforts (Maintaining Cordova configurations, integrating native SDKs and APIs).
- Lead role in architecting and maintaining the build and distribution process for the client-side codebase.
- Extensive knowledge in mobile UI/UX.
- Knowledge of common pitfalls and the ability spotting out performance bottlenecks on Cordova hybrid apps.
- Engaged in Scrum methodologies as part of an Agile development team.
- Solely responsible for front end development for our Minimum Viable Product.
- Responsible for implementing specifications to create robust and well written features, and wrapping core functionality in Unit Tests.
- Collaborated with 1 other front-end engineer to develop a production quality AngularJS based client-side infrastructure which is still in use and in production today.
- Honed my abilities and determination by working with a small team with tight deadlines and big ideas.
- Got the chance to be a part of the very beginnings of a startup and create an impact in the conception of the product.

Stack: JavaScript, Ruby, AngularJS, React, Cordova/PhoneGap, CSS, SASS, HTML, PostgreSQL, Firebase, Redis, Grunt, Karma.

Blubeta Miami, FL — *Software Engineer*

JANUARY 2014 - MARCH 2014

Shortly after joining Blubeta, SYNKT Games took us under their payroll to work fulltime on *letsRUMBL*. In the short time spent at Blubeta, I accomplished the following.

- Architecting and developing the entire stack for project consultation platform for professionals in the medical sector.
- Conversed extensively with client to derive a concrete data model that best fit their needs.

LANGUAGES

English, Spanish

- Designed an attractive and user-friendly UI based on client feedback and opinions.
- Leveraged WordPress as a User Management System which hooked up to a custom PHP core application.

Stack: *PHP, Ruby, Ruby On Rails, MySQL, PostgreSQL, JavaScript, Coffeescript, CSS, SASS, HTML, HAML, GIT.*

Richweb Media Parkland, FL — Front End Developer

JULY 2012 - JANUARY 2014

Richweb Media (now *RWM Digital*) is a small Digital Marketing firm focused on SEO, SMM, and web development with a vast repertoire of clients in various markets. Responsibilities and accomplishments included the following.

- Tasked with conceptualizing and designing compelling UIs for web development contracts.
- Was required to quickly and effectively generate close-to-life prototypes to retrieve the most accurate client feedback.
- Created custom WordPress themes that mirrored the approved conceptual artwork for web development contracts.
- Implemented highly responsive HTML and CSS layouts for desktop and mobile ready websites.
- Collaborated with SEO team to implement the best On Page SEO strategy for each individual project.

Stack: *PHP, MySQL, JavaScript, HTML, CSS, WordPress, Photoshop, Illustrator.*

Freelance Davie, FL — Full Stack Web Developer

2006 - 2013

As a freelance developer I got the chance to not only teach myself the core principles/technologies of web development, but also to learn about client relations, marketing, and entrepreneurship.

EDUCATION

Broward College Fort Lauderdale, FL — A.A. Computer Science

2010 - 2012
